Here's what a Canberra visitor had to say:-

We were in Vanuatu for three weeks in January and February 2014 and stumbled on Volcanic Earth when we got lost exploring. It was the best stumble ever. I sat in the car with my sleeping daughter whilst my partner when to start a treatment. He chose the men's back treatment. When my daughter woke up we went inside and my daughter received a children's pedicure. The staff were beautiful and friendly. When my partner finished I went in for a full body coconut lime and vanilla body scrub. The staff gave my partner and daughter a tour whilst I was getting my treatment. We were so happy with our experience that we came back another 3 times on our trip. It is an amazing professional experience with the friendliest of touches that I would highly recommend this place to anyone. The massages are out of this world and the treatments a real luxury!! Thanks girls you rock.

At this point I'm sure your bones are starting to say "please can we go" and although you may have 100 reasons which suggest otherwise, the one reason why you should go is simply because "you will not experience anything like this anywhere else" – WHY? because no one makes natural skin care/beauty products like Volcanic Earth, and no one else uses techniques that Volcanic Earth prides themselves on. It's these unique products and unique techniques that gives your body what it needs to relax, to heal and to rejuvenate.
